

Capilla del Monte, Córdoba, Argentine
Year 2025

**To the attention of
International Organizations and Institutional Authorities
Present**

Dear Sir or Madam,

I have the honor to submit for your consideration the **Comprehensive Framework for Digital Sovereignty, Economic Transparency and Sustainable Technological Transition**, a legislative package composed of eight (8) interconnected draft laws conceived as a State-level regulatory architecture aimed at strengthening data governance, economic transparency, responsible investment, digital security and sustainable technological development in the Argentine Republic.

This Framework is structured around a **core Open Sovereign Data Law**, which operates as a transversal pillar, and is complemented by specific regulations addressing ethical tokenization, beneficial ownership transparency, mandatory disclosure of strategic external assets, the expansion of investment incentive regimes with social and technological counterparts, technological rent mechanisms, inclusive digital transition policies, environmental sustainability of technological infrastructure, and cybersecurity with a focus on digital identity.

The initiatives included in this package have been designed in an **autonomous yet harmonized manner**, ensuring legal certainty, institutional coherence, federal coordination, and alignment with international standards and commitments assumed by Argentina, while fostering transparency, traceability, risk reduction and long-term economic stability.

This Framework is not intended to impose restrictive or punitive measures, but rather to establish **preventive, organizational and strategic rules** that enhance the State's capacity to anticipate structural challenges, protect digital rights, strengthen institutional trust, and create predictable conditions for productive investment and responsible innovation.

In light of the accelerated global technological transformation and the increasing relevance of data, digital infrastructure and cybersecurity as strategic assets, this Framework is submitted with the conviction that it may contribute positively to international dialogue, cooperation, and the consolidation of sustainable, transparent and inclusive digital governance models.

I remain at your disposal for any further information and thank you for your attention.

Yours sincerely,
